Roberts Drive Traffic Impacts and Construction Update for the week of 3/6/17 to 3/10/17

This week the plan for the Roberts Drive waterline project is to begin installing 12" water line in the East Bound Lane heading towards 169; this will be closed down to (1) lane traffic with flaggers at each end. Two marked Police Officers will remain at each end of the project (Lake Sawyer Road Intersection & 169 intersection). Police will be assisting traffic with the detours and allowing the local residents, local deliveries, and anyone looking to access any businesses within the Roberts Drive closure.

Later in the week another crew will begin digging bore pits for preparation of a directional drill operation. This will require an additional flagging crew and one lane closure as this operation will be happening at the same time as the crew installing the 12" water line but will be in separate locations.

Please be cautious driving through, as there will be heavy equipment and dump trucks traveling back and forth on Roberts Drive along with the (2) different crews on Roberts drive and two separate locations with one lane closures controlled by flaggers. Expect some traffic delays with the one lane closures; GBI traffic crews will attempt to keep them to a minimum.

There have been inquiries about water service being effected. At this point there should be no interruption in water service. Residents can expect to be notified beforehand by the City, if an interruption in their service will be occurring.

Please contact the City of Black Diamond at 360-886-5700 for additional information.
