EXHIBIT A - SCOPE OF WORK

City of Black Diamond

Roberts Drive, West End of Rock Creek Bridge to Sunny Lane, Roadway Improvements

GOALS AND OBJECTIVES

The goals and objectives of this Scope of Work include:

- Design improvements to the existing Rock Creek Bridge that will rehabilitate it and extend its useful life for 20 years or more. The design work will take into account the highest levels of traffic that the bridge will experience in the next 20 years
- Prepare plans, specifications, and an opinion of probable cost for the rehabilitation of the Rock Creek Bridge, construction of a pedestrian bridge; and minor roadway widening and sidewalk improvements to Sunny Lane.

PHASE 1 – ROADWAY IMPROVEMENTS

Task 1 – Project Management and QA/QC

Goal

Maintain constant and thorough communications with the City of Black Diamond to maximize teamwork and productivity. Maintain control of the project scope, budget, and schedule. Provide quality service and products to the client.

Approach

The approach to Task 1 includes:

- Schedule and coordinate the work of all team members and ensure that work is completed within scope and budget.
- Perform a quality control review of major deliverables prior to submittal to the City.
- Coordinate project documentation to include:
 - Prepare necessary project correspondence to support the project work.
 - Provide all work products to the client for review in accordance with the scope and schedule.
 - Ensure that the Draft and Final deliverables are in compliance with the scope of work and professional standards and provide meaningful input into the design process.
- Coordinate with City staff on all aspects of project completion to include:
 - Prepare and submit monthly progress billings to the City.
 - Provide additional identification of issues and proposed solutions if unforeseen issues arise.

Deliverables

The deliverables for Task 1 consist of the following:

- Monthly progress reports. The monthly report, addressing progress of the work, shall include as appropriate:
 - Summary of actual versus scheduled cost.
 - Summary of actual versus scheduled progress.
 - Narrative to define unanticipated issues, responsive action requirements by Parametrix.

Project Schedule

It is assumed the contract will be complete by December 31, 2014, and that the City will advertise the project for construction in January 2015. Delays due to unforeseen circumstances (i.e., additional meetings or extended review periods) may result in additional effort necessary for project management and administration.

Task 2 – Survey

Goal

To provide a base map for use in preparing the contract documents.

Approach

2.1 Mapping

Parametrix will perform topographic mapping. Mapping limits will include surface features within the existing right-of-way (ROW). Using record information and existing monuments, Parametrix surveyors will establish horizontal and vertical control along Roberts Drive from approximately 350 feet west of the Rock Creek Bridge to a point approximately 100 feet easterly of Sunny Lane.

Mapping will consist of locating existing improvements and ground conditions within the above-described right-of-way. Parcel lines and right-of-way limits will be based upon the applicable public records. Ground features including tops and toes, breaks, water surface elevations, edge of pavement, and ditches will be mapped at sufficient detail to create 1-foot contours. Structures such as fences, driveways, overhead utilities, wing walls and other physical visible improvements will be mapped. An underground utility locate firm will be hired to mark buried utilities such as gas, water, power, telephone, and TV cable, if such utilities have a conductible source or tracer lines attached. Sanitary and storm structures will be opened and measurements will be made identifying size, type, and invert elevation of incoming and outgoing pipes. Once the field work has been completed, a survey technician will process the data and prepare a base map using AutoCAD Civil 3D, Release 2014.

2.2 AutoCAD Base Map Preparation

Parametrix will process survey field data and generate an AutoCAD drawing showing the existing conditions.

Parametrix will show the existing ROW for the project corridor and parcel lines adjacent to the ROW.

An underground utility locate firm will be hired to mark buried utilities that provide a conductible signal. For those utilities constructed without a tracing wire or made from non-conductible material, record drawings will be used to help identify locations and type of utility if provided by the City.

Deliverables

The deliverables for Task 2 consist of the following:

- AutoCAD drawing in 2014 format, or later, at 1 inch = 20 feet with 1-foot contours, topographic information, and easements along the mapping corridor.
- Triangular Integrated Network (TIN) surface for use in design.

Assumptions

Following are the assumptions for Task 2:

- Title reports will not be ordered for this work; boundary information will be based upon recorded information available from King County.
- Property corners will not be set, nor will a Record of Survey be prepared.

Task 3 – Preliminary Design

Goal

To provide preliminary plans and an opinion of cost to the City for review prior to completing final design.

Approach

 - A 6-foot wide pervious concrete sidewalk from approximately 200-feet west of the structure to Buckners Way where pedestrians will cross to the north side of the roadway.
 - A 4-foot wide porous asphalt shoulder from the Rock Creek bridge to Sunny Lane.
 - HMA Overlay from Rock Creek Bridge to Sunny Lane.
 - Design of a shallow retention system at Sunny Lane on south side of the roadway to prevent drainage from Roberts Drive from inundating pervious shoulder.
- It is anticipated that porous pavements will be used for roadway widening and the new sidewalk. Therefore, no additional water quality or flow control facilities are anticipated. Changes in the project scope that would exceed thresholds for stormwater mitigation will be considered as additional services not included in this scope of work or in the budget estimate.
- Black Diamond City Engineer will run three infiltration tests and provide the Consultant with a long term infiltration rate for the pervious asphalt design and for shallow retention systems.
- Comments received on the preliminary design will be incorporated into the 90% plans, specifications, and opinion of cost included in Task 4.

Assumptions

Following are the assumptions for Task 6:

- The scope of services and budget estimate do not include the preparation of a critical area report, which may be requested by WDFW following review of the JARPA. If a critical area report or other additional information other than that which is available in the JARPA is necessary for permit approval, Parametrix will prepare an amendment for the City's consideration to complete this additional work.
