## **Roberts Drive Traffic Impacts and Construction Update for the week of 3/27/17 to 3/31/17**

This week the contractor will be finishing up the directional drilling operation in front of Diamond Villages. They are scheduled to remove the jersey barriers in front of Diamond Villages by Thursday of this week. The road will then be restored to a state of where residents in Diamond Villages will not have restricted access anymore. The contractor's pipe crew on Phase 1 should tie into the West end of the directional drill pit by Mid-Week, they will then jump roughly 350' East and connect to the East end of the HDPE directional drilled pipe. They will head East towards 169 for the remainder of the week. The East Bound lane of Roberts Drive will remain graveled to please use caution while driving in this area.

The contractor's pipe crew on phase 3 has made it to the top of the hill and will tie into the project site this week. The contractor will be in intersection of Lake Sawyer Road and Roberts Drive so traffic will be controlled and routed differently than it has been. Please make sure to be aware of the flaggers and drive slowly as this will be a busy area this week. Later in the week that crew will jump back down to the West side of the Rock Creek Bridge and will begin installing fire hydrants, air vac's and water services. It will remain a (1) road during construction hours.

**Please contact the City of Black Diamond at 360-886-5700 for additional information.**
